

Pin-Less Global Debit Network

HOW IT WORKS

PIN-LESS WEB

PIN-Less Web allows you to process bank card payments with lower transaction fees. As of 2010, there are nearly 200,000 web-based payment portals in the US that could be saving money with PIN-Less Web Services.

PIN-Less Web is a completely free and easy way to use your existing online payment portal to save on transaction fees. Whether you are a hosting company, utility or online service provider, you are very likely to receive Visa & MasterCard debit payments. Approx. 40% of your card payments are bank-issued check cards which could be processed as PIN-Less debits. PIN-Less Web allows debit these cards using your existing payment processing vendor, systems and customer bank-issued cards saving you 30% on each transaction. With so many Payment Processing companies and systems Pin-less has works to add our service to your existing Website Payment Processing Systems. This requires very time and is a free and easy for you. Working with pin-less will not require you to switch to a new payment processing company.

ADD PIN-LESS DEBIT TO YOUR EXISTING WEB PAYMENT SYSTEMS & PROCESSOR

PIN-Less has worked to add our service to your existing website payment processing systems. This requires very little time and is free and easy for you. Working with PIN-Less will not require you to switch to a new payment processing company.

HOW TO START USING PIN-LESS WEB

In most cases processing Pin-less Web requires a small and safe modification to your websites code. Pin-less can provide this modification for you free of charge or send the modification requirements to your website manager and step them through the tasks to start processing Pin-less Web transactions. The service is free, seamless for you and your customer and typically takes 3-5 business days to complete.
